Read more Recover lost or deleted files from your memory card and external hard drive. Memory card reader: It is essential to have a card reader to safely remove files from memory card. That way you can read and write files on it, then, of course, you can save files to it. The memory card reader is also an important tool for watching movies, taking pictures, and doing other things when you are using the camera. Now, you have two options. You can buy a card reader, or you can use an adapter to connect your camera to a card reader. Cards are usually inserted into the side of the card reader. Now, there are two ways to get the card out of the reader. You can either slide it out, or you can twist it out. If you have a camera with a card slot, you can put a card directly into the camera and it will automatically be put into the card reader if there is one. This is what we call auto-detection.
